EDUCATION

Purdue University Ph.D. Student in Engineering Technology (AI in Smart Manufacturing), GPA: 4.0/4.0	Aug. 2023-May. 2028
Columbia University M.S. in Mechanical Engineering (Robotics and Control), GPA: 3.67/4.0	Sept. 2021-Dec. 2022
University of Science and Technology Beijing (USTB) B.E. in Safety Engineering, GPA: 3.75/4.0	Aug. 2016-June. 2020
UC Berkeley/UCLA Exchange Program in Mechanical Engineering, GPA: 3.91/4.0, 3.85/4.0	Jan. 2019-Aug. 2019

- Relevant Graduate and Undergraduate Coursework: Generative Model, Optimization for Deep Learning, Artificial Intelligence, Reinforcement Learning, Robotics Studio, Robot Learning, Evolutionary Algorithm, Intro to Robotics, Modern Control, Digital Control, Data Science for Mechanical Systems, Digital Signal Processing, Dynamic System and Feedback, Creative Robot Design and Production, Intelligent Control Theory

RESEARCH EXPERIENCE

Onsite Research: Transformer-based Deep Learning Approach for Quality Prediction in 3D Printing	Jan. 2024-present
--	-------------------

Advisor: Prof. Xingyu Li, Purdue University

- Established the camera-assisted 3D printing system and collected layer-by-layer image dataset for printed objects.
- Realized accurate pattern prediction for subsequent printed layer utilizing transformer-based deep learning model.

Onsite Research: GRASNet, A Novel Graph Neural Network for Human Action Recognition	Aug. 2023-Jan. 2024
--	---------------------

Advisor: Prof. Xingyu Li, Purdue University

- Developed a novel Graph Neural Network model for improving human action recognition and well-being assessment in manufacturing.
- It can outperform other advanced GNN models, and the validation was conducted on NTU RGB+D 120 benchmark dataset.

Onsite Research: Multi-View Videos Synchronization	Feb. 2022-May. 2022
---	---------------------

Advisor: Prof. Sunil Agrawal, Robotics and Rehabilitation (RoAR) Lab, Columbia University

- Developed audio and brightness methods for synchronizing multi-view physical-therapy videos for physiologists to analyze the effect of rehabilitation for children with cerebral palsy and improved the algorithms and minimized the error for audio method to 50ms.
- Proposed a systematic solution to multi-view videos synchronization for rehabilitation analysis including deep learning method.

Remote Research: Deep Reinforcement Learning-based Haptic Enhancement Framework	Sept. 2021-Feb. 2022
--	----------------------

Advisor: Dr. Ziwei Wang, Human Robotics, Imperial College London

- Proposed a deep RL-based haptic enhancement framework to facilitate remote palpation without installing force sensors on telesurgery robot.
- First authored the paper “Deep Reinforcement Learning based Haptic Enhancement for Tele-Diagnosis” published on WCCI, 2022.

Projects

-
- **Medical Image Classification Using Deep Learning for Alzheimer’s Detection (Instructed by Prof. John Wright) [\[PDF\]](#)**
Achieved classification of Alzheimer’s Disease with magnetic resonance images and compared two CNN-based models (Python, Deep Learning)
 - **Birdman and LarvaBot (Instructed by Prof. Hod Lipson, Columbia University) [\[PDF\]](#) [\[Video\]](#)**
Mechatronic design and production of bipedal robot “Birdman” and soft robot “LarvaBot” (3D Printing, Gait Optimization using Pybullet)
 - **Boxing Robot (Instructed by Prof. Sunil Agrawal, Columbia University) [\[PDF\]](#) [\[Video\]](#)**
Achieved 3D pose reconstruction of boxing motion captured by markless optical cameras based on deep learning and control algorithms (MATLAB, Deep Learning, PID Control)

HONORS AND AWARDS

Employee Recognition Award for Departmental Achievements (Purdue University)	March. 2024
Presidential Doctoral Excellence Fellowship (Purdue University)	Aug. 2023
Outstanding Undergraduate of USTB / The People’s Scholarship of China	June. 2020 / Oct. 2019

SKILLSET

C++/C, Python, MATLAB, PyTorch/TensorFlow, CAD, ROS, Gazebo/Pybullet, Adobe PR/AE/PS, Arduino/Raspberry Pi
